Caravel Custodial RWA Lending Platform on Stellar

Here for advice, not money.

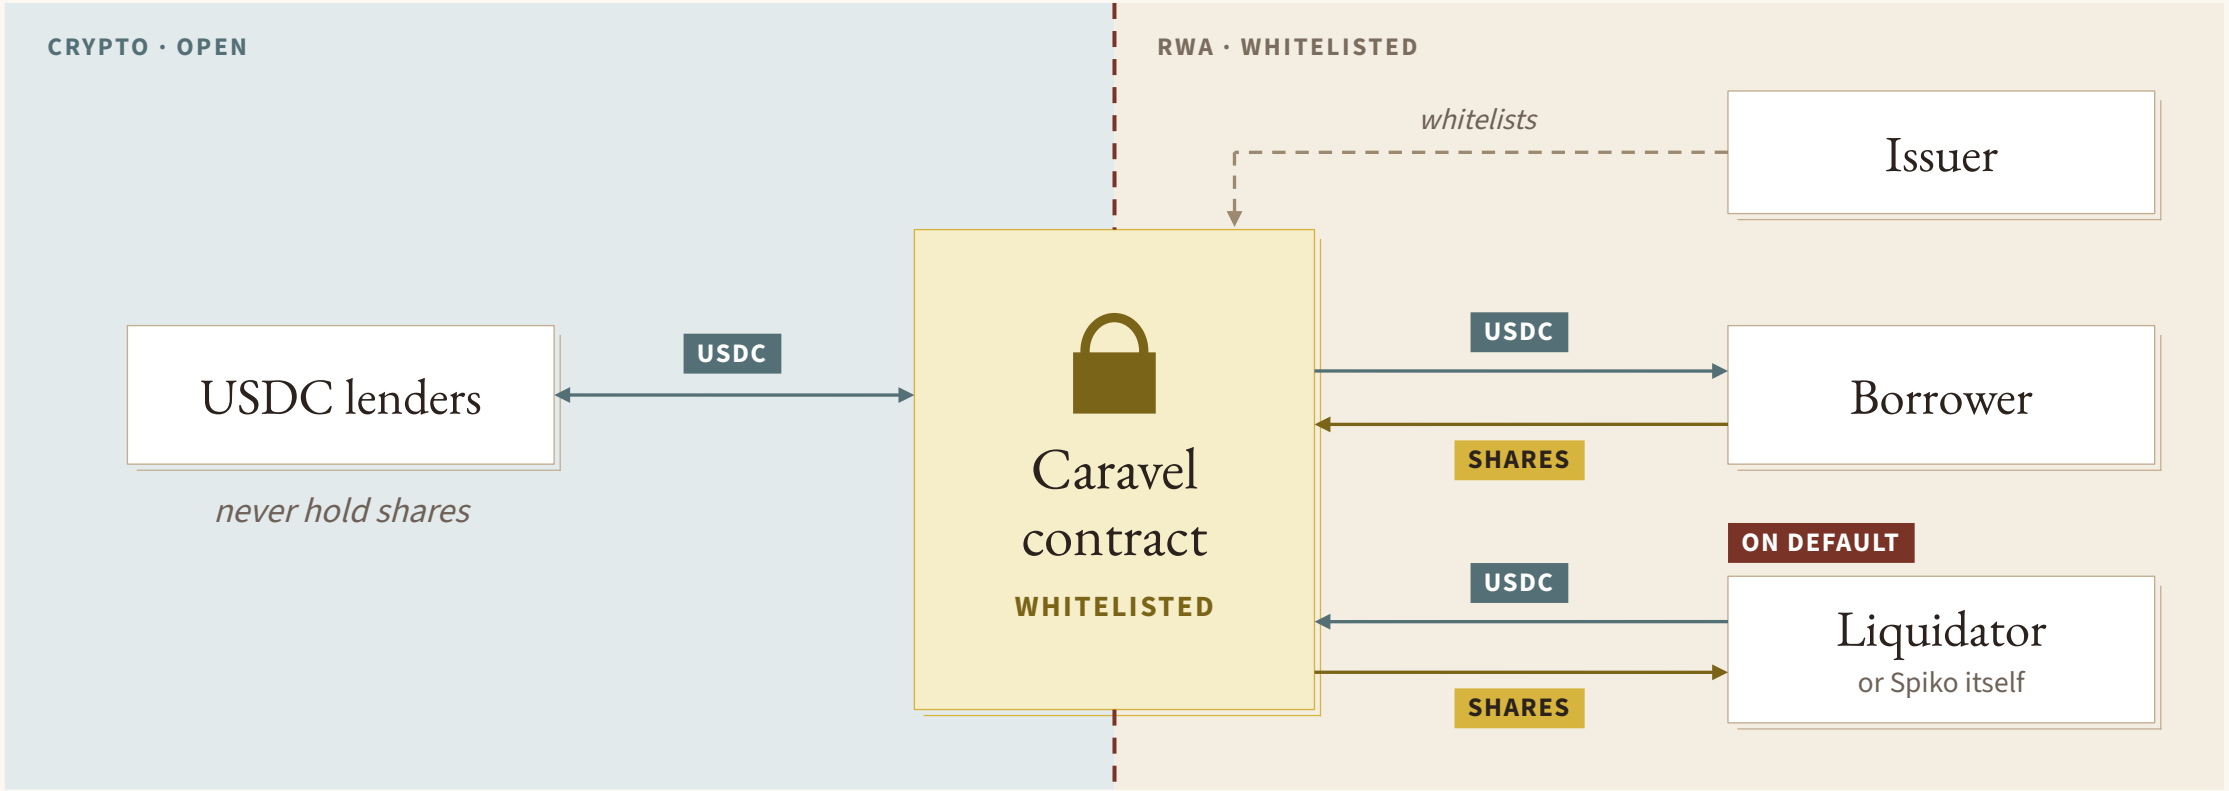

Does anyone actually use SAFO to borrow or earn? Is there a gap?

OUR BACKTEST · DAILY ENTRIES IN PROFIT

EUR carry	99–100%	7–9.5%/yr on equity
USD carry	0–2.5%	86–100% only if subsidised

Backtest, small size: daily entries Jun 2024–Oct 2026. EUR: Morpho live market, equity at 88% LTV (Caravel 70%: ~4.9%). USD: market rates; subsidy 3.33%.

One whitelisted contract bridges crypto and RWA

Is a whitelist-crossing structure possible? Would issuers approve it?

Sources: Caravel README (How it works); kyc-assets report, 25 Oct 2026. Shares = fund shares, e.g. Spiko SAFO.

Rates, traded like a Bitcoin order book

	APR %	USDC	TOTAL
Lenders	**6.50**	100	300
	6.00	100	200
	5.00	100	100
	spread 0.50		SPARK?
Borrowers	**4.50**	100	100

Few interested. Not validated.

LIVE TESTNET APP

Who in the market would use this? What would be the spark?

Live testnet book, caravel-repo.pages.dev/app, 27 Oct 2026, no wallet. Depth = cumulative USDC. Who else: backtest scenarios S1–S4, untested.

Next few days: a pivot at every failure

Which step fails first? Is that the right pivot?

Sources: brief (MB, 27 Oct); kyc-assets report; backtest report; Caravel TASKS.md. [confirm] = drafted, not yet confirmed by MB.
